### **DETAILED ACTION**

Applicants' amendment dated 05/19/2005 has been received and entered. By the amendment, claims 6-14, 17-19 and newly added claims 20-23 are now pending in the application.

Applicant's arguments with respect to claim 6 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Specification***

1. The disclosure is objected to because of the following informalities: "17" in last line of page 15 should be changed to --15--.

Appropriate correction is required.

#### ***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the only reflective layer being disposed between the color layers must be shown or the feature(s) canceled from the claim(s).

No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure

Art Unit: 2871

must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 21 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 21, it is confusing and unclear how only the reflective layer can be disposed between the color layers. According to the specification and drawing (figure 2) beside the reflective layer (15), a protective layer also formed between the color layers (16). Correction is required to clarify the claimed invention.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2871

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 6-14 and 17-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Applicants' admitted prior art (APA), figure 7, in view of Kurauchi et al., US Patent No.

5,917,572.

Regarding the above claims, APA discloses a liquid crystal display (LCD) device (figure 7) comprising:

- . a color filter substrate (lower substrate 201) having a substrate (201), a reflective layer (205), a color filter layer (206) formed directly on the reflective layer;

- . an opposed substrate (upper substrate 202), wherein neither the color filter nor the opposed substrate contains a light shielding layer (see figure 7);

- . a liquid crystal layer (203);

- . a plurality of spherical spacers (212);

- . a sealing material (204).

APA, however, does not disclose that a stacked color filter outside the effective layer display area does not contact the opposed substrate and the sealing material. Kurauchi et al. do disclose a stacked color filter (204) can be formed outside the effective layer display area (e.g. pixel 188), wherein such color filter layer does not contact an opposed substrate (substrate 181) and a sealant (191)(see figure 22). Therefore, it would have been obvious to one skilled in the art at the time of the invention was made to employ a stacked color filter over the APA's color filter substrate and outside the effective layer display area as shown by Kurauchi et al. in order to

Art Unit: 2871

form a spacer (stacked color filter acts as a pillar spacer (col. 17, ln. 55), so as to obtain a color LCD device with a high display performance (col. 2, ln. 33).

### ***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
